Subject: Town Highway 14

Town of Bristol
Valerie Capels & select board;

I write to request from whomever to consider my request to have Town Highway 14 that is located on the southerly portion of our property to be thrown up?

Traveling Purinton Road, headed south, having Town Highway 14 on your left, you can only actually travel this road for approximately 900' feet before the road just disappears into the forest.

Yet because it is still listed on the state map people sometimes make attempt to travel it and end up traveling on personal, private land in an attempt to regain the exit on the eastern end near Russell's; upper Meehan Road.

It is my understanding that the town is allocated a certain amount of funds from the federal government to help maintain these class 4 roads to some degree.

To the best of my knowledge and from what I/we have observed there has been no enhancement over the last 35 plus years; the only action I have observed is people making attempts to travel this class 4 road and as I said prior, traveling on personal property!

The first 900' is still observable only because that section of this class 4 road was utilized to retrieve crop off fields from farmers; no maintained from the town!
