Bristol Town Roads Foreman

Good Morning Eric,

Attached is a record of the email conversations I've had with Joe Kelly regarding posting a sign at the entrance of Sycamore Park. I'd like to talk to you about this at some point, soon, and will give you a call at the Town Garage to set a time. In the meantime I want you to have this information so you're up on the issue so far.

I am representing the Bristol Conservation Commission regarding this issue.

Cordially,

cc: Valerie Capels, Bristol Town Manager

Good Monday afternoon Richard Butz –

It was a pleasure speaking with you today about the Sycamore Park entrance on VT-116 in Bristol (44.097587, -73.094194). To assist patrons with locating the entrance, I recommend installation of a white on green street name sign.

It appears from our records that the access is not a town highway but instead is a private road. In compliance with the Manual on Uniform Traffic Control Devices (MUTCD), the sign blade should be 12" in height with 6" text and also should have "PVT" on the sign, indicating it as a private road. Attached are two draft sign designs for your consideration. Since the sign will be in excess of 42" long, we recommend that it be installed on two posts. Either a double-sided sign on post top-mount brackets will be needed or two sign panels installed back to back on the same posts. Installation height should be at least 6 FT above the ground to bottom of sign.

I invite you to work with Randy Snelling of VTrans Maintenance District #5 (copied) to determine the Right of Way (ROW) width of VT-116 and also to determine if an 1111 permit is required for the work. Unfortunately VTrans will not be able to procure any materials for this project, install the assembly or maintain it once installed. The Town of Bristol will likely be the responsible party.

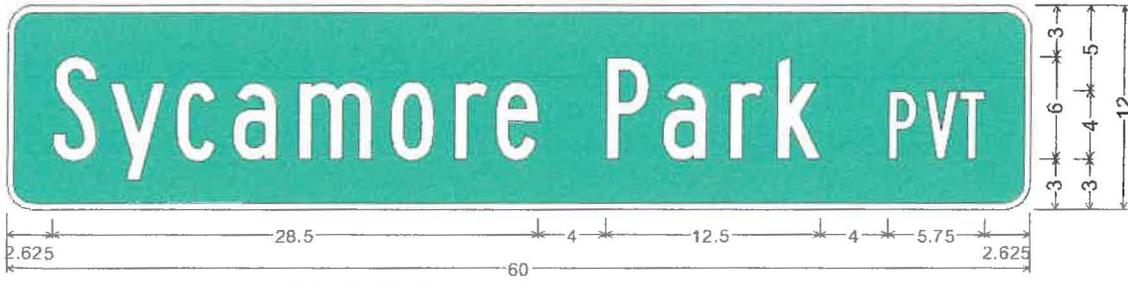

Please feel free to contact me with any traffic sign related questions, J.

Yes a S-1111 permit would be required, the Town of Bristol would be the applicant and they would be required to erect and maintain the sign per VTrans standards if they choose to do so, as it would be within the State Highway ROW.

Regards, Randy
